

Nacci Batten Divider System Data Sheet

Product Details

Type Push In, Hidden fixing, freestanding Battens in Solid timber & Aluminium

Materials Red & Yellow cedar, Hemlock, American hardwoods, Australian hardwoods, Aluminium

Finishes Various stains and clear coats for timber with both group 3 & group 1S
Aluminium Powder-coated Various colours
Aluminium wood grain sublimation ('wood look')

Standard Batten Sizes **Timber** 42X65, 42X90, 42X140 **Aluminium** 40X60, 40X100, 50X150, 40x200

Fixing System Aluminium black 6mm thick fixing plates, and stainless-steel connection shaft with M5 Grub screw fixing point on side of batten.

top / bottom

Mid Support Threaded rod coupled with black aluminium spacer tubes.

Profile Spacing 21mm - 100mm+ spacing, spacing specified per project

Profile Length Aluminium 5.0m / 6.0m & Timber 1.8m to 6m selected lengths (custom length available)

Applications & Installation

Application Interior & exterior wall dividers, Screens

Installation Top & bottom base plates with pocket for shaft connection, Top connection has a stainless shaft with square end, a tapered side groove on the shaft is used in - conjunction with a side mounted m5 grub screw which when fastened, locates and secures the top shaft and bottom Lug for secure and fast install.

Battens are machined to suit any required trimming on site and hardware holes are already done for a quick and accurate install.

Warranty

Interior Timber battens 7 years

Interior Aluminium battens 10 - 25 years dependant on surface coating

Environmental FSC® accredited material supplier
PEFCT™ chain of custody material supplier

Our aluminium components sourced locally, the raw aluminium coming from Tiwai Point Smelter

Timber battens group ratings

For compliance with **NZBC C/AS2**, according to the requirements of **AS/NZS 3837:1998** and **AS 5637.1:2015**, untreated solid timber achieves a **Group 3 rating** for use as wall or ceiling linings, as per the **National Construction Code (NCC 2022)**

| Timber species | Group rating (untreated) | Group rating (Paint / stain as per table A1) | Group rating (FireZone 92 & vanguard) | Suitable for external use | Density (kg/m ³) |
|---------------------------------|--------------------------|--|---------------------------------------|---------------------------|------------------------------|
| Western red cedar | 3 | 3 | 1-S | Yes | 400 |
| Yellow Alaskan cedar | 3 | 3 | 1-S | Yes | 500 |
| Hemlock | 3 | 3 | 1-S | No | 500 |
| American / Australian hardwoods | 3 | 3 | 1-S | Yes | 700 |

Nacci timber profiles have a minimum overall thickness of 18mm & minimum overall width of 28mm.

Firezone Reference - Tested to EN13501-1:2018 in accordance with NZBC C/AS2 Clause 4.17 FireZone™ 92 system has achieved a B-s1-d0 European reaction to fire classification rating on timber with a minimum density of 338kg/m³ and minimum thickness of 9mm.

Waterborne or solvent borne paint coatings, varnish or stain. As per A1 table requirement

| Table A1 Specified performances for some substrate and coating combinations | | |
|--|---|---------------------------------------|
| Coating (coating in good condition and well adhered to substrate) | Substrate | Performance (with or without coating) |
| Waterborne or solvent borne paint coatings ≤ 0.4 mm thick Polymeric films ≤ 0.2 mm thick | Concrete and masonry ≥ 15 mm thick Sheet metal ≥ 0.4 mm thick, or Fibre-cement board ≥ 6.0 mm thick Glass | G1-S |
| Waterborne or solvent borne paint coatings ≤ 0.4 mm thick | Gypsum plasterboard with or without paper facing ≥ 9.5 mm thick ≥ 400 kg/m ³ core density < 5% wt organic contribution to board | G2-S |
| Waterborne or solvent borne paint coatings, varnish or stain ≤ 0.4 mm thick ≤ 100 g/m ² | Solid wood or wood product ≥ 9.0 mm thick ≥ 600 kg/m ³ for particle boards, or ≥ 400 kg/m ³ for all other wood and wood products | G3 |

Note: The requirements of this table do not apply to metal faced panels with polymeric substrate.

Aluminium battens group ratings

(Battens tracks & components)

For compliance with **NZBC C/AS2**, aluminium 6060-T5 is classified as a **non-combustible material**, and therefore does not require a Group Number under Table C1.1. If coated or used in a composite system, please refer to the below table for aluminium coating fire ratings.

| Aluminium coating | Group rating (un-coated) | Group rating (Metwood sublimation) | Group rating (Powder-coat) | Suitable for external use |
|-------------------|--------------------------|------------------------------------|----------------------------|---------------------------|
| Batten range | Non combustible | 1-S | 1-S | Yes |
| Tracks / TCR | Non combustible | 1-S | 1-S | Yes |
| Components | Non combustible | 1-S | 1-S | Yes |

Powder-coat - BRANZ - Report No. FH 5532-TT ISSUE 3 (2020)

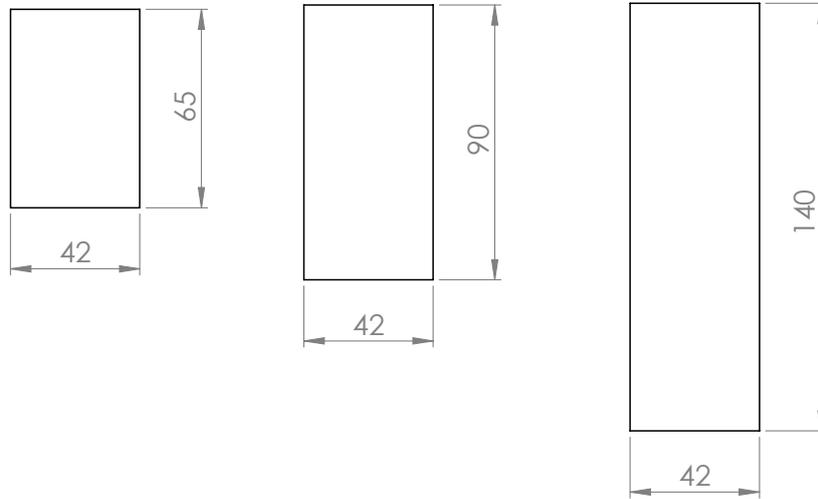

Metwood woodgrain sublimation - BRANZ - Report No. FH 16947-01-1-C1 (2023)
