Architectural systems,
beautifully designed, confidently built.

Solid Timber Panelling

A Simple decorative lining for ceilings,
& feature walls

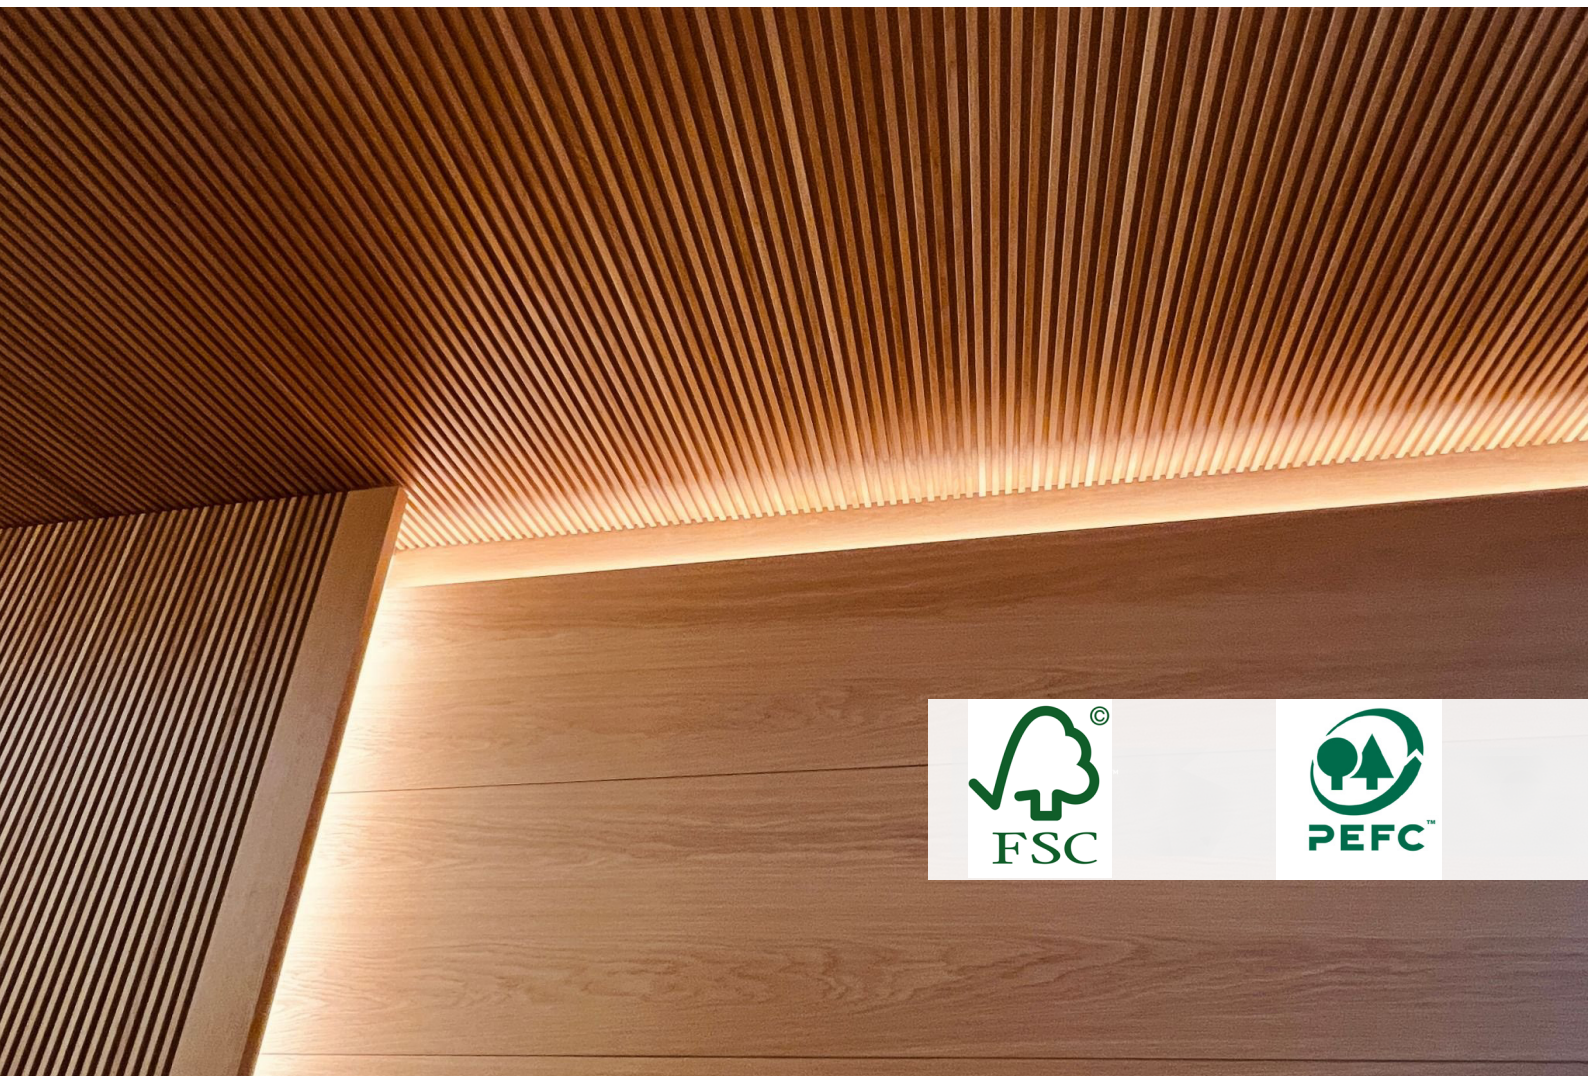

Contemporary Architectural Panelling by Nacci

Bring your vision to life with Nacci's premium architectural panelling systems – designed to complement modern materials and elevate both residential and commercial environments. The Nacci range offer sophisticated linear textures that create depth, rhythm, and refined character across any surface.

Crafted for design flexibility and lasting performance, Nacci panels are ideal for feature walls, facades, and internal linings, combining aesthetics with practical innovation.

Why Specify Nacci Panels?

- Sustainably sourced timbers – Available in a wide range of certified timber species from responsible forestry
- Environmental credentials – Options include FSC® and PEFC™ certified timber
- Fire performance – Group 3 fire rating as standard (upgradable to Group 1 with Firezone®)
- Clean installation – Secret-fix system delivers fast setup and a seamless finish
- Integrated design – Precision-milled tongue and groove system ensures a refined, interlocking appearance
- Flexible sizing – Supplied in random lengths or pre-cut set lengths to match project requirements
- Pre-finished colours – Available in a curated range of factory-applied finishes for consistency and convenience
- Indoor/outdoor versatility – Engineered for both sheltered and exposed applications

**Fast Quotations:**

simply provide the square meterage of your ceiling, wall, or screen.

Reduced Lead Times:

Our Product is on the Shelf in New Zealand, just choose the timber and finishing options and we will machine and send it out within weeks.

Easy Installation:

No specialized installation skills are required. Panels are made to be 'knocked up quickly'

Stylish Profile Designs & Customization:

Choose from a variety of profile designs to achieve your desired aesthetic effortlessly or customize your project our timber-profiling knives are made in-house, so whatever the profile, we can get it done.

Designer Palette:

Explore a range of pre-finished color options to unlock endless creative possibilities.

Cost-Effective:

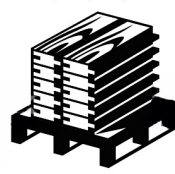

With Nacci, the convenience of quick quoting, reduced lead times, and easy installation translates to both financial and time-saving benefits for your project.
